DETAILED ACTION

Allowable Subject Matter

Claims 37-48 are allowed.

Claim 50 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 49 and 51 are rejected under 35 U.S.C. 102(e) as being anticipated by Haag et al (5,976,141).

Haag et al teaches:

49. (new) A stabilizer for use with a medical implant, comprising:

a body having an octagonal shape (see figure 1) and a substantially smooth upper surface (see figure 2), a hole 10 extending through said body and having an axis, said hole having at least one tapered section 12, and at least one finger (34 and/or 22) extending away from said axis.
